Objective

Passionate frontend and full-stack developer with a focus on crafting responsive, user-centric websites and web applications. Adept at using modern web technologies to deliver intuitive and engaging user experiences. Looking for opportunities to contribute and grow in dynamic projects.

Skills

- **Frontend:** HTML, CSS, JavaScript, React, Tailwind CSS
- **Backend:** Node.js, Express, PHP
- **Database:** MongoDB, MySQL
- **Version Control:** Git, GitHub
- **Design Tools:** Figma, Photoshop
- **Animations:** GSAP, Locomotive JS, Lenis JS, Framer Motion

Experience

Reimagine Hackathon Sep 2024
Sheryians Coding School

- Achieved finalist status, ranking in the top 12 among 700+ teams across India.
- Developed fully animated, responsive landing pages using modern tools like GSAP, ScrollTrigger, and Locomotive.
- Enhanced website performance through optimization of assets such as images, fonts, and scripts.
- Focused on UI design to showcase the brand with engaging animations and a modern aesthetic.

Volunteership Dec 2023 – Feb 2024
Indian Institute of Computer Science

- Assisted faculty in web development and graphic design workshops.
- Helped organize workshops and lectures to create an interactive learning environment.
- Supported students with technical guidance and problem-solving.
- Contributed to creating study materials and resources for effective learning.

Education

Advanced Diploma in Web Development Jul 2022 – Sep 2024
Indian Institute of Computer Science

10th and 12th (CBSE) 2020, 2022

Projects

NetflixGG
A movie trailer platform inspired by Netflix, designed to showcase trending films and trailers. Built using React and TMDB APIs, it features real-time updates and a sleek, responsive UI. This project demonstrates skills in API integration, dynamic content display, and seamless navigation.
GitHub Link | Live Link

Skinny Dipped
Focused on reimagining the static UI of an existing brand's website to create a visually modern and intuitive design. Highlights creativity in design and emphasizes the power of UI to make an impact.
Live Link

Harley Davidson
Redesigned the Harley Davidson website with a modern, user-friendly layout, focusing on aesthetics and usability. This static project showcases design skills and creativity in improving existing UIs.
